---

## PROFESSIONAL SUMMARY

Dedicated and versatile Full-Stack Developer with 3+ years of experience in building dynamic web and mobile applications. Expert in React.js, Next.js, Node.js, Spring Boot and MYSQL Database.

Passionate about creating secure, user-friendly solutions that solve real-world problems. Proven track record of delivering 20+ projects with a focus on seamless UI/UX and efficient backend architecture.

---

## PROFESSIONAL EXPERIENCE

### Full-Stack Developer Intern | Information Network Security Administration (INSA)

- Developed and maintained full-stack web applications using Spring Boot, Next.js, and MYSQL Database.
- Built and integrated RESTful APIs for frontend and backend communication.
- Collaborated with team members to design, develop, test, and deploy enterprise-level applications.
- Participated in database design, debugging, and software maintenance while following software development best practices.

### Freelance Full-Stack Developer | Self-Employed

- Successfully delivered 10+ software projects, including Hospital Management Systems, House Rental Management Systems (HRMS), Transportation Management Systems (TMS), Gaming System, Gibi Gubaye Management System (GGMS), Web Application Firewall (WAF), eCommerce platforms, and other custom web applications.
- Managed the complete Software Development Life Cycle (SDLC) from requirements

gathering and system design to development, testing, deployment, and maintenance.

- Developed responsive full-stack applications with secure authentication, database integration, and user-friendly interfaces.

---

## EDUCATION

### Bachelor of Degree in Software Engineering | Mizan Tepi University

Focus on Software Development, Database Management, and System Security | Graduated: 2026

---

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

**Frontend:** React.js, Next.js, Tailwind CSS, Redux Toolkit, Framer Motion

**Backend:** Node.js, Express.js, FastAPI ,Django, Spring Boot

**Databases:** MongoDB, PostgreSQL, MySQL

**Tools & DevOps:** Git, GitHub, Docker, Postman, Vercel, Render

**Specializations:** RESTful APIs, OAuth, Responsive Design

---

## KEY PROJECTS

### E-COMMERCE PLATFORM

**Description:** Developed an Amazon-like shopping platform to streamline online retail experiences.

**Key Feature:** Features an immersive AR product preview capability for enhanced user interaction.

**Technologies Used:** Next.js, TypeScript, Node.js, MongoDB

### INTERACTIVE 3D PORTFOLIO WEBSITE

**Description:** Designed and built a highly customizable personal portfolio website.

**Key Feature:** Implemented engaging 3D visual elements and interactive design components.

**Technologies Used:** React, JavaScript, Bootstrap

## ADVANCED SCIENTIFIC CALCULATOR

**Description:** Engineered a high-performance web-based scientific calculator application.

**Key Feature:** Equipped with interactive 3D graphing capabilities for complex mathematical equations.

**Technologies Used:** Next.js, TypeScript, Tailwind CSS

## INSA WEBSITE (INSTITUTIONAL PORTAL)

**Description:** Developed an interactive institutional web portal tailored for organizational use.

**Key Feature:** Integrates a built-in virtual campus tour for a more engaging user navigation experience.

**Technologies Used:** React, JavaScript, MySQL, Bootstrap

## HOSPITAL MANAGEMENT SYSTEM

**Description:** Built a comprehensive web application designed to digitize and streamline daily hospital workflows and administrative tasks.

**Key Features:** Includes comprehensive modules for patient management, smart appointments, medicine inventory, laboratory tracking, detailed patient histories, and clinical diagnosis workflows.

**Technologies Used:** HTML, CSS, JavaScript, PHP, MySQL, Bootstrap

## FLEET & TRANSPORT MANAGEMENT SYSTEM

**Description:** Designed and developed a comprehensive web-based transportation asset, workforce coordination, and logistics management platform to modernize operations for the Information Network Security Administration (INSA).

**Key Features:** Implemented real-time vehicle allocation engines, a 3-phase automated inspection and preventive maintenance tracker, route optimization maps, morning/night odometer attendance logs, and so.

**Technologies Used:** Next.js, React, TypeScript, Tailwind CSS, Spring Boot (Java), MySQL, Web Socket, GPS & Google Maps APIs

## HOUSE RENTAL MANAGEMENT PLATFORM

**Description:** Programmed a comprehensive management dashboard tailored for real estate administration.

**Key Feature:** Simplifies tenant applications, rental property tracking, and digital lease agreements.

**Technologies Used:** Next.js, TypeScript, Tailwind CSS, MongoDB, Express.js

## CAFETERIA MANAGEMENT SYSTEM

**Description:** Created a unified operational ecosystem to digitize and manage daily cafeteria workflows.

**Key Feature:** Provides automated modules for custom menu planning, inventory tracking, and order processing.

**Technologies Used:** Next.js, TypeScript, Tailwind CSS, MongoDB, Express.js

## AUTOMATED LOTTERY MANAGEMENT SYSTEM

**Description:** Engineered a secure administrative system to oversee and run large-scale lottery operations.

**Key Feature:** Features secure digital ticket sales management, automated winner selection, and prize distribution.

**Technologies Used:** Next.js, TypeScript, Tailwind CSS, MongoDB, Express.js, Web Socket

## INTERACTIVE SPINNER GAME

**Description:** Developed a lightweight, highly responsive interactive spinner game application.

**Key Feature:** Built with optimized animations using modern web frameworks for an engaging user experience.

**Technologies Used:** Next.js, TypeScript, Tailwind CSS, MongoDB, Express.js

## ONLINE BINGO GAME

**Description:** Designed and deployed a dynamic multiplayer online bingo gaming platform.

**Key Feature:** Features real-time state management to support concurrent user sessions and interaction.

**Technologies Used:** Next.js, TypeScript, Tailwind CSS, MongoDB, Express.js, Web Socket

## WEB APPLICATION FIREWALL (WAF) CONTROL CENTER

**Description:** Architected a robust security dashboard dedicated to managing web application protection.

**Key Feature:** Features real-time threat detection capabilities along with active automated security response systems.

**Technologies Used:** React, TypeScript, Tailwind CSS, PostgreSQL, Django

## CERTIFICATES & ACHIEVEMENTS

- **UDACITY:** Programing Fundamentals | 2025
- **UDACITY:** Android Development Fundamentals | 2025
- **UDACITY:** Data Analysis Fundamentals | 2025
- **UDACITY:** Artefcial Intelegency Fundamentals | 2025
- **INSA:** Cybersecurity | 2025
- **FREECODECAMP:** Responsive Web Design
- **FREECODECAMP:** JavaScript & Data Structures
- **FREECODECAMP:** Frontend Librarie
